

Part A: Parent Page Update

Route: </explore-projects>

1.1 Updated Grid Behavior

- **The New "Hero" Card (Top of Grid):**
 - **Title:** Modern Contemporary Single-Family Residence
 - **Subtitle:** A thoughtfully crafted home that blends minimalist design, natural materials, and functional elegance for elevated everyday living.
 - **Button Text:** Explore
 - **Link:** </explore-projects/riverside-way>
- **Existing Placeholder Cards:**
 - **Action:** All other "Explore" buttons are removed
 - **Logic:** These remain as visual proof of volume/style, but the only active conversion path is top card that leads to the Riverside Way

Part B: The New Project Page

URL: ritzbuilders.com/explore-projects/riverside-way

1. Metadata & SEO (Non-Negotiable)

- **Title Tag:** Luxury Modern Contemporary Home in Cupertino
- **Meta Description:** Discover a luxury modern contemporary home in Cupertino, designed and built by Ritz Builders, showcasing unmatched, high-end custom design in Silicon Valley.
- **H1:** Riverside Way - Cupertino New Home Construction
- **Robots:** [index](#), [follow](#) | **Canonical:** <https://ritzbuilders.com/explore-projects/riverside-way>

2. Page Sections (In Order)

Section 1: Hero

- **Visual:** Full-width high-resolution imagery ([HeroSection.png](#)).
- **Overlay Text:** * **H1:** Riverside Way - Cupertino New Home Construction
 1. **Sub-headline:** Award-winning modern contemporary new construction in Cupertino, designed and built by Ritz Builders.
- **CTAs:**
 1. **Primary:** [Request Private Consultation] (Scrolls to Form)
 2. **Secondary:** [View Home Gallery] (Scrolls to Gallery)

Section 2: Proof Strip

- **Awards:** (Imported Award Logos/Text Strip from the home page (/))
- **Specifications underneath:**(Imported from Details pages (/detail))
 - **Type:** New Construction (Teardown → Rebuild)
 - **Style:** Modern Contemporary

- **Square Feet:** 3,494 SF
- **Lot Size:** 7,770 SF
- **Beds:** 4 | **Office:** 1 | **Baths:** 4.5

Section 3: Description Block

Riverside Way is a masterclass in modern elegance, meticulously designed and built by Ritz Builders. This award-winning modern contemporary residence in Cupertino harmonizes clean lines with expansive windows and a warm, natural material palette. Every space is curated for an effortless flow, offering a serene and high-end living experience that defines the new standard of Silicon Valley luxury.

Section 4: The Gallery (22 Images) - SAME TEMPLATE AS

<https://sastudio.design/projects/river-side/> but must be responsive on mobile as well

The gallery will be deployed in a "cinematic" sequence. Every image includes a unique, SEO-optimized alt-tag: – all in the file Rivera.zip

Section 5: Minimal FAQs (Crawlable HTML)

- **Is it better to do design-build or hire an architect and builder separately?**
 - Design-build is usually better when the priority is one accountable team, fewer change orders, and tighter coordination. Separate architect + builder can work well, but misalignment often shows up in budget, constructability, and timeline. Ritz Builders operates as an integrated design-build team for modern custom homes.
- **What should be checked before buying a lot for a new construction home?**
 - Before purchase, confirm the basics: buildable area, grading/slope impacts, access/driveway feasibility, utilities, tree constraints, easements, and neighborhood/design restrictions. A quick feasibility review can prevent a “beautiful lot, impossible project” situation. Ritz Builders can provide an early lot review to validate fit.

- **How do homeowners avoid going over budget on a new custom home?**
 - Avoid blowups by locking alignment early on scope, finish level, and structural complexity, and using a team that does preconstruction cost modeling before permits. The biggest overruns come from designing something that can't be built for the target budget without painful redesign. Ritz Builders runs preconstruction discipline upfront to prevent that trap.
 -
- **How long does it take to build a modern custom home in Silicon Valley?**
 - Most projects follow four phases: feasibility to design/engineering to permitting to construction. The total timeline depends on approvals, lot complexity, and how coordinated the team is. Integrated design-build teams such as Ritz Builders reduce rework and "handoff delays" that stretch schedules.
- **What is the best way to start a custom home build in the Bay Area?**
 - Start with a feasibility + budget alignment call before paying for full plans. The goal is to confirm site constraints, realistic scope, and timeline so design doesn't get value-engineered later. Ritz Builders starts with a private consultation to confirm fit, then maps the next steps.

Section 6: Final CTA & Global Form

- **H2:** Request a Private Consultation
 - **Copy:** Interested in a modern contemporary custom home in Cupertino? Contact Ritz Builders to begin a private consultation.
 - **Component:** [Global Form Embed]
 - **Phone (Footer/Contact):** (669) 800-9012
-

12-Point QA Final Check

1. **URL:** </explore-projects/riverside-way> — **Confirmed.**
2. **SEO Tags:** Exact match for Title, Meta, and H1 — **Confirmed.**
3. **Address:** No street address or "San Jose" mentions — **Confirmed.**
4. **Brand:** Credits Ritz Builders exclusively — **Confirmed.**
5. **Gallery Count:** 22 images total — **Confirmed.**
6. **Alt Text:** Unique, per-image, contains "Ritz Builders" + "Cupertino" — **Confirmed.**
7. **FAQs:** Crawlable HTML, no "scary" process talk — **Confirmed.**
8. **CTA 1:** Jump-link to Form — **Confirmed.**
9. **CTA 2:** Jump-link to Gallery — **Confirmed.**
10. **Parent Page:** Only Riverside Way is clickable — **Confirmed.**
11. **Tone:** Luxury, minimal, no "contractor" or "cheap" language — **Confirmed.**
12. **Mobile:** Global form is fully responsive — **Confirmed.**
