

Frequently Asked Questions

(h3)What awards has Ritz Builders won?

At the 2025–2026 Americas Property Awards, part of the International Property Awards, Ritz Builders were honored with three distinct awards: **Residential Property Development (California)**, **Architecture Single Residence (California)**, and **Residential Interior (California)**. These awards are evaluated by an independent panel of global industry experts, recognizing excellence in design and project execution.

(h3)What services does Ritz Builders offer?

Ritz Builders provides architect-led design-build services for luxury custom homes in the Bay Area. Services include lot feasibility, architectural design, engineering coordination, permitting, and construction management through one integrated team.

(h3)Does Ritz Builders specialize in teardowns and rebuilds on existing lots?

Yes, Ritz Builders specializes in teardown and rebuild projects in Bay Area markets where older homes are often replaced with newly designed custom residences. Ritz Builders manages the process from demolition planning and permitting through site preparation and new construction.

(h3)Is the home design fully customizable?

Yes, Ritz Builders creates fully custom homes designed around the client, the property, and the goals of the project. Ritz Builders does not rely on pre-set templates, which allows each home to be tailored in layout, architecture, and interior detail.

(h3)Does Ritz Builders assist with land selection and feasibility?

Yes, Ritz Builders helps evaluate lots before purchase by reviewing zoning, FAR (Floor Area Ratio) limits, tree restrictions, hillside conditions, and WUI (Wildland-Urban Interface) fire codes that can affect what can be built. This gives clients more clarity before moving forward.

(h3)What is the advantage of Ritz Builders' design-build approach?

Ritz Builders' architect-led design-build approach aligns design, budget, permitting, and construction under one team. Ritz Builders uses this structure to reduce communication gaps, improve cost visibility, and create a more efficient path from concept to completion.

(h3)What is included in Ritz Builders' construction process?

Ritz Builders' process includes discovery, pre-construction, design development, permitting, construction, and final handover. Each phase is managed closely to give clients clear visibility from early planning through completion.
