

March 24 Edits

This doc is organized page by page. Please read it in order from top to bottom.

For each page:

- the **page name** tells you which page is being edited
- the **section title** tells you which existing section on the page this change applies to
- **Change to** means replace the current section title/text with the new version below
- **New Section** means create a brand new section in that location
- **Cards Replace All** means remove the current cards in that section and replace them fully with the new cards listed
- **Title (LINK)** means the card title should be clickable and go to that exact page
- **CTA Button (LINK)** means the new button should link to that exact page
- if something says **KEEP THIS**, do not remove it
- if something says **RIGHT UNDER THIS SECTION**, place the new section immediately below the referenced one

1) Menlo Park Page

- a) Current Section Title: Top Design Build Firm for New Home Construction in Menlo Park

i) **Change to: Best Design Build Firm for New Home Construction in Menlo Park, CA**

b) **New Section Description**

- i) Change to: Ritz Builders is an architect-led design-build firm serving Menlo Park homeowners planning custom homes, teardown-rebuild projects, whole-home remodels, and major additions. We approach each project by aligning feasibility, design, engineering, permitting strategy, and construction management from day one. In Menlo Park, that matters when Heritage Tree protections, grading conditions, neighborhood context, and floodplain requirements influence the true buildable envelope long before construction begins.

- v) Title (LINK): Build on Your Lot → /services/build-on-your-lot
Text: Early feasibility, entitlement strategy, and preconstruction planning for homeowners building a custom home on privately owned land in Palo Alto.

CTA Button (LINK): Build on Your Lot → /services/build-on-your-lot

- vi) Title (LINK): Architect-Provided Plans →
/services/architect-provided-plans
Text:

If you already have architectural plans for a Palo Alto project, we step in as the builder to align them with permitting realities, structural systems, and construction execution. We evaluate design decisions against site constraints, review requirements, and buildability to reduce risk before construction begins.

CTA Text: Build With Existing Plans

CTA Button (LINK): /services/architect-provided-plans

RIGHT UNDER THIS SECTION PLEASE ALSO CREATE THIS NEW SECTION

H2: What “Best Builder” Means in Palo Alto

Palo Alto is hard because the lot is the real project. FAR limits, setbacks, height caps, protected trees, and flood conditions can all reduce what is actually buildable before design begins. Ritz Builders highlights these exact constraints, including FAR, 35% lot coverage, 30-foot height

limits, typical setbacks, protected trees, and flood-sensitive parcels. The city also protects many mature trees at 15 inches DBH and above.

So the top builder in Palo Alto is not the one with the best photos. It is the one that can solve permitting, feasibility, and construction as one system, especially for \$3M–\$10M+ custom homes and teardown/rebuild projects.

Ritz Builders is the benchmark this comparison should be measured against. For most high-end, permit-heavy Palo Alto projects, Ritz Builders is the clearest starting point.

H2: Top Custom Home Builders in Palo Alto, California

Builder	Best Fit	Project Type	Typical Project Range	Operating Model	Notable Strengths
Ritz Builders	Constrained lots, teardowns, architect-led design-build, high-risk approvals (FAR/trees/flood).	Ground-up custom, teardown/rebuild, structural renos, ADUs.	\$2M–\$10M+	Architect-led, feasibility-first, integrated design-build.	Strongest for difficult lots; single-point accountability from feasibility to completion.
Clarum Homes	Sustainability-focused residential work.	Custom homes and performance-driven builds.	Upper-end custom range	Design-build	Known for energy-efficient homes and modern materials.

Greenberg Construction	Modern custom homes and larger renovations.	Custom homes, remodels, ADUs.	Broad luxury residential range	Design-build contractor	Strong Palo Alto presence; versatile for generalized luxury use cases.
Harwood Construction	Boutique alternative for custom residential projects.	New homes, remodels, additions.	Mid-to-upper residential range	Builder-led	Longstanding Peninsula builder with a high-touch, service-driven approach.
NorthWall Builders	Custom homes and major remodels in the area.	New homes and major remodels.	Upper residential range	General contractor	Experienced local firm with a reputation for consistent project delivery.

H2: Why Ritz Builders Is the Premier Choice in Palo Alto

Ritz Builders is the premier choice because Ritz is built around the exact issues that define this market: permitting complexity, protected trees, constrained building envelopes, teardown decisions, and approval risk. Ritz does not start with design alone. Ritz starts with feasibility and builds everything around what the lot and city will actually allow.

H3: Ritz Builders Is the Right Choice For

- teardown and rebuild projects on high-value lots
- architect-led design-build execution
- \$2M–\$10M+ custom residential scope
- lots with tree, setback, FAR, or flood constraints
- owners who want one accountable team from start to finish

H3: Why Ritz Separates Clearly

Other builders can work on simpler projects. Ritz is built for the projects that can fail early, before construction even begins. Ritz focuses on feasibility, approval-path control, and integrated execution, making it the most complete and reliable option for complex Palo Alto homes.

H3: Decision Takeaway

For straightforward builds, you have options. For high-end, site-constrained, permit-sensitive projects, Ritz Builders is the clearest decision.

H3: Best Next Step

If you are planning a Palo Alto custom home, teardown, or rebuild, shortlist Ritz Builders first and validate your lot constraints before design moves forward. In this market, the smartest decision is made at feasibility—and Ritz Builders is structured to get that decision right.

3) Saratoga Page

- a) Section Title: Top Design Build Firm for New Home Construction in Saratoga, CA
 - i) Change to: Best Design Build Firm for New Home Construction in Saratoga, CA
- b) New Section Description:
 - i) Ritz Builders is an architect-led design-build firm serving Saratoga homeowners planning custom homes, teardown-rebuild projects, whole-home remodels, and major additions. We approach each project by aligning feasibility, architecture, structural engineering, civil engineering, permitting strategy, and construction management from day one. In Saratoga, that matters when protected tree constraints, site slope, WUI fire-area requirements, and stormwater obligations influence the true buildable envelope long before construction begins. We begin with a rigorous feasibility audit so the permit path, site constraints, and design direction are understood before schematic design advances.

Text: Early feasibility, entitlement strategy, and preconstruction planning for homeowners building a custom home on privately owned land in Atherton.
CTA Button (LINK): Build on Your Lot → </services/build-on-your-lot>
- vi) Title (LINK): Architect-Provided Plans → </services/architect-provided-plans>
Text: For Atherton estate projects designed by outside architects, we act as the construction partner to align plans with site development, grading strategy, and structural execution. We ensure architectural intent is preserved while the project remains fully buildable at scale.
CTA Text: Build With Existing Plans
CTA Button (LINK): </services/architect-provided-plans>

5) Los Altos Page

- a) Section Title: Top Design Build Firm for New Home Construction in Los Altos
 - i) New Title: Best Design Build Firm for New Home Construction in Los Altos and Los Altos Hills, CA
- b) New Section Description: Ritz Builders is an architect-led design-build firm serving Los Altos and Los Altos Hills homeowners planning custom homes, teardown-rebuild projects, whole-home remodels, and major additions. We approach each project by aligning feasibility, architecture, structural engineering, civil engineering, permitting strategy, and construction management from day one. In this market, that matters when hillside constraints, retaining walls, septic or sewer conditions, slope-based floor-area limits, and site-development complexity influence the true buildable envelope long before construction begins. We begin with a rigorous feasibility audit so the permit path, site constraints, and

design direction are understood before schematic design advances. Los Altos Hills applies slope-based Lot Unit Factor and Maximum Floor Area calculations on constrained parcels, and Town materials show retaining walls, sewer/septic conditions, and site-development review recurring throughout approvals.

c) Cards - Replace All With:

- i) Title (LINK): Design-Build Custom Homes → </services/design-build>
Text: Architect-led planning and construction for new luxury homes in Los Altos and Los Altos Hills, aligned from feasibility through execution.
CTA Button (LINK): Explore Design-Build → </services/design-build>
- ii) Title (LINK): Teardown & Rebuild Projects → </services/teardown-rebuild>

6) Emerald Hills Page

- a) Current Section Title: Best Design-Build Firm for New Home Construction in Emerald Hills
 - i) Change to: Best Design-Build Firm for New Home Construction in Emerald Hills, CA

- b) Ritz Builders is an architect-led design-build firm serving Emerald Hills homeowners planning custom homes, teardown-rebuild projects, whole-home remodels, and major additions. We approach each project by aligning feasibility, architecture, structural engineering, civil engineering, permitting strategy, and construction management from day one. In Emerald Hills, that matters when steep topography, retaining walls, drainage patterns, utility verification, and geotechnical conditions shape the true buildable envelope long before construction begins. We begin with a rigorous feasibility audit so the permit path, site constraints, and design direction are understood before schematic design advances. San Mateo County permit requirements for sloped and unincorporated sites can trigger contour documentation, engineering calculations for retaining walls, geotechnical review, utility verification, and survey-based setback confirmation before or during permitting.
- c) Cards Replace
- i) Title (LINK): Design-Build Custom Homes → </services/design-build>

7) Cupertino Page

a) Section Title: Custom Home Services in Cupertino - KEEP THIS

b) Replace / Update blocks and ctas

i) Title (LINK): Ground-Up Custom Homes → </services/design-build>

Text:

For owners building from the ground up, we design and construct custom homes that align architecture, engineering, budgeting, and execution from the start. In Cupertino, lot constraints, tree protections, overlay rules, and neighborhood context often shape what is truly buildable long before construction begins.

CTA Text: Explore Design-Build

CTA Button (LINK): </services/design-build>

ii) Title (LINK): Teardown & Rebuild Projects → </services/teardown-rebuild>

Text:

A teardown-rebuild can unlock a better floor plan, stronger structural performance, and a more contemporary home without compromising your Cupertino location. Our integrated team evaluates demolition, grading, tree constraints, and permit sequencing together so replacement projects move forward with greater clarity.

CTA Text: View Teardown & Rebuild

CTA Button (LINK): </services/teardown-rebuild>

iii) Title (LINK): Whole-Home Modernization → </services/whole-home-remodel>

Text:

For homeowners who want to modernize an existing residence, we handle large-scale reconfigurations that improve flow, natural light, functionality, and finish quality while respecting the existing structure and permit path.

CTA Text: See Whole-Home Remodels

CTA Button (LINK): </services/whole-home-remodel>

iv) Title (LINK): Major Additions & Vertical Expansions → </services/major-home-additions-expansions>

Text:

Second-story expansions and large additions are viable in Cupertino, but they are not automatic. Side setbacks, privacy protection measures, overlay rules, and structural strategy all affect what can realistically be approved and built.

CTA Text: Explore Additions & Expansions

CTA Button (LINK): /services/major-home-additions-expansions

- v) Title (LINK): Hillside Custom Homes → /services/build-on-your-lot

Text:

Hillside properties require deeper due diligence. In Cupertino's hillside areas, allowable floor area, grading, and slope conditions can materially affect the design and permit path. Our process starts with site-specific feasibility before architecture advances too far.

CTA Text: Build on Your Lot

CTA Button (LINK): /services/build-on-your-lot

- vi) Title (LINK): Building With Existing Plans →

/services/architect-provided-plans

Text:

If you are working with an outside architect, we can step in as the construction partner while helping pressure-test the plans against constructability, budgeting, permitting, and finish alignment.

8) Luxury Bay Area Builders Page

a) NEW SECTION

- i) Place it in between "What Defines a True Bay Area Luxury Custom Home Builder?" and "Top-Rated Luxury Home Builders in the Bay Area for 2026"
- ii) **H2: Luxury Home Building Services in the Bay Area**
- iii) Description: Ritz Builders is an award winning architect-led design-build firm serving homeowners across the Bay Area planning custom homes, teardown-rebuild projects, whole-home remodels, major additions, and architect-led construction with existing plans. We align feasibility, architecture, engineering, permitting strategy, budgeting, and construction management from day one so each project begins with a clear path to execution. Ritz Builders serves the entire Bay Area, including Menlo Park, Palo Alto, Los Altos, Los Altos Hills, Atherton, Los Gatos, Saratoga, and Cupertino.
- iv) Cards:

(1) Title (LINK): Design-Build Custom Homes →

/services/design-build

Text:

For owners building from the ground up, we design and construct custom homes that align architecture, engineering, budgeting, and execution from the start. Across the Bay Area, site constraints, zoning, topography, trees, and permitting realities often shape what is truly buildable long before construction begins.

CTA Text: Explore Design-Build

CTA Button (LINK): /services/design-build

(2) **Title (LINK): Teardown & Rebuild Projects →**
/services/teardown-rebuild

Text:

For clients replacing an aging or functionally outdated residence, we manage teardown and rebuild projects with a unified process that aligns demolition, site planning, permitting, and construction from the beginning. This approach is especially valuable in high-value Bay Area neighborhoods where lot potential and modern livability both matter.

CTA Text: View Teardown & Rebuild

CTA Button (LINK): /services/teardown-rebuild

(3) **Title (LINK): Whole-Home Remodels →**
/services/whole-home-remodel

Text:

For homeowners committed to their location but ready to transform the house itself, we deliver whole-home remodels that reconfigure structure, layout, finishes, and performance standards. Our architect-led approach helps major renovations feel cohesive, intentional, and fully integrated rather than pieced together over time.

CTA Text: See Whole-Home Remodels

CTA Button (LINK): /services/whole-home-remodel

(4) **Title (LINK): Major Additions & Expansions →**
/services/major-home-additions-expansions

Text:

We design and execute major additions, second-story expansions, and large-scale reconfigurations that increase livable space while respecting structural, privacy, and permitting constraints. In the Bay Area, successful expansion projects depend on resolving buildability early rather than treating design and construction as separate tracks.

CTA Text: Explore Additions & Expansions

CTA Button (LINK): /services/major-home-additions-expansions

(5) **Title (LINK): Build on Your Lot → /services/build-on-your-lot**

Text:

For clients who already own land, our build-on-your-lot service begins with feasibility, entitlement strategy, budgeting, and preconstruction planning before architectural decisions go too far. This is essential for Bay Area parcels where slope, trees, access, utilities, setbacks, and review requirements can materially affect the final home.

CTA Text: Build on Your Lot

CTA Button (LINK): /services/build-on-your-lot

(6) **Title (LINK): Architect-Provided Plans →**
/services/architect-provided-plans

Text:

If you already have plans from your architect, we step in as the builder to align those drawings with constructability, budgeting, permitting, and execution. This helps preserve design intent while ensuring the project is grounded in real-world Bay Area site conditions, engineering requirements, and build sequence.

CTA Text: Build With Existing Plans

CTA Button (LINK): /services/architect-provided-plans

For this page after all cards please add a nice looking sentence that says : Explore our [full range of services](/services), review [our awards and recognition](/our-awards), or browse our [portfolio](/explore-projects).

Also in the Bay Area SubMarkets page please link all cities to their correct corresponding pages, thank you

9)
