

/services Page Reconstruction

PAGE TEARDOWN & PRESERVATION GUIDE

Before building the new sections, please restructure the current live </service/s> page as follows:

- **KEEP:** The Hero background image.
- **KEEP:** The 6 images used in the "Custom Home, Teardown-Rebuild & Remodeling Services" cards.
- **KEEP:** The "Proven Results Across the Bay Area" portfolio carousel section.
- **KEEP:** The "Ready To Start Building?" contact form section at the bottom.
- **DELETE:** The "Not Sure Which Path Fits Your Project?" table section (we are replacing and moving this lower).
- **DELETE:** The "Core Custom Home Services in the Bay Area" 3-column text grid (this is redundant).
- **DELETE:** The old "Why Choose Ritz Builders" block with the blue lines (we are replacing this with a much stronger proof block).

Global Developer Instructions & Technical SEO

- **Rendering:** Server-side render this page. The current client-side JS rendering returns 415 errors to crawlers. All meta tags, JSON-LD, and body content must be in the initial HTML response.
- **Internal Links:** All internal links must use relative paths. Ensure the trailing text perfectly matches the anchor text provided in the copy below.

Meta Data

- **URL Slug:** </services/> (Keep current)
- **NEW Title Tag:** [Luxury Custom Home Services Bay Area | Ritz Builders](#)
- **NEW Meta Description:** [Architect-led design-build for the Bay Area's most complex custom homes. Ground-up builds, teardowns, remodels, and additions. Schedule a consultation.](#)

[Adjust in shema, code, html where ever needs to be updated](#)

PAGE COPY & STRUCTURE (Top to Bottom)

HERO SECTION

- **Background:** Keep the existing hero background image.
- **H1:** Architect-Led Custom Home Building Services in the Bay Area

- **Hero Subtitle:** Every high-end residential project in the Bay Area starts differently. You may have architectural plans ready to build. You may own a lot. You may need to tear down and start over. Ritz Builders meets you at your starting point and guides the project through feasibility, design, permitting, and construction - with one accountable team.
- **Primary Button:** [Schedule a Consultation](#) (*Link to /contact-us*)

THE TRUST BAR

(Dev Note: Place this as a horizontal strip immediately beneath the hero section with simplistic icons)

- BIA Bay Area Member
- Silicon Valley & Peninsula
- Custom Homes from \$2M–\$10M+
- Cupertino Headquarters
- America's Property 2025-2026 Award Winner

SECTION 1: ENTITY DEFINITION

H2: Who Is Ritz Builders?

Ritz Builders is an architect-led design-build firm based in Cupertino, California, specializing in luxury custom homes, teardown-rebuilds, whole-home remodels, and major residential additions across Silicon Valley and the San Francisco Bay Area. Unlike traditional general contractors who execute plans handed to them, Ritz Builders leads with architectural thinking and structured preconstruction planning: aligning design intent, site feasibility, budget, and construction methodology before ground is ever broken. The firm serves homeowners in Cupertino, Palo Alto, Los Altos, Los Altos Hills, Los Gatos, Menlo Park, Saratoga, and surrounding communities.

SECTION 2: SERVICE CARDS

H2: Find Your Starting Point

Every homeowner arrives with a different situation. Select the path that matches yours.

(Dev Note: Please reuse the 6 existing service card images currently on the live page for these respective blocks).

Card 1

- **H3:** I Already Have Architectural Plans
- **Body:** You have approved drawings and need a builder who can execute them at the level your architect intended. Ritz Builders conducts a full constructability review, aligns your plans to a transparent budget, and coordinates directly with your architect throughout construction. Typical investment: \$2M–\$10M+.
- **Link:** [Review My Plans](#) → (*Link to /services/architect-provided-plans*)

Card 2

- **H3:** I Own a Lot and Want to Build
- **Body:** You have land and need a team to evaluate what's buildable, navigate local zoning, and take the project from site feasibility through architectural design and ground-up construction. Ritz Builders manages this entire sequence for client-owned lots across Silicon Valley. Typical investment: \$2.5M–\$10M+.
- **Link:** [Discuss My Lot](#) → (Link to /services/build-on-your-lot)

Card 3

- **H3:** I Need Design and Build From One Team
- **Body:** You want architectural design, cost estimating, permitting, and luxury construction managed under one roof: no fragmented handoffs between architect, engineer, and builder. Ritz Builders' integrated design-build division unifies all of these under single-point accountability. Typical investment: \$2M–\$10M+.
- **Link:** [Start Design-Build](#) → (Link to /services/design-build)

Card 4

- **H3:** I Want to Tear Down and Rebuild
- **Body:** Your current property no longer fits your life or your investment goals. Ritz Builders manages the complete replacement process, from existing structure assessment and demolition permitting through design and ground-up construction of a modern luxury home. Typical investment: \$2.5M–\$10M+.
- **Link:** [Explore Teardown-Rebuild](#) → (Link to /services/teardown-rebuild)

Card 5

- **H3:** I Want a Whole-Home Remodel
- **Body:** You want to keep your property, but fundamentally rethink the layout, finishes, and structural flow. Ritz Builders executes large-scale residential remodels that go far beyond surface updates — reconfiguring floor plans, upgrading structural systems, and installing premium finishes throughout. Typical investment: \$1M–\$5M+.
- **Link:** [Plan My Remodel](#) → (Link to /services/whole-home-remodel)

Card 6

- **H3:** I Need a Major Addition or Expansion
- **Body:** You need more space, but want the addition to feel like it was always part of the original home. Ritz Builders designs and constructs major residential expansions, second stories, wings, ADUs, and basement buildouts that integrate with existing architecture and satisfy local zoning requirements. Typical investment: \$700K–\$3M+.
- **Link:** [Discuss My Expansion](#) → (Link to /services/major-home-additions-expansions)

SECTION 3: COMPARISON BLOCK

H2: Architect-Led Design-Build vs. the Traditional Approach

Most Bay Area homeowners choose between hiring an architect and a separate builder, or hiring a general contractor who subcontracts everything. Both models create gaps. Ritz Builders eliminates those gaps with an architect-led design-build structure that keeps design intent, construction reality, and budget aligned from day one.

(Dev Note: Build this table using semantic HTML `<table>`, `<th>` with `scope="col"`, and `<tr>`. Highlight the Ritz column with the brand's primary accent color and bold the text to visually emphasize it. **Make it helpful for mobile users by ensuring the table scrolls horizontally** so columns aren't cut off).

Capability	Traditional GC	Architect + Separate Builder	Ritz Builders (Architect-Led Design-Build)
Architectural design leadership	Not included, executes plans only	Architect designs; builder may not understand intent	In-house architect-led team designs and builds together
Budget alignment during design	Budget often unknown until bidding phase	Architect designs without cost input; builder reprices later	Real-time cost estimating integrated into every design decision
Preconstruction feasibility	Rarely offered	Architect may assess; builder does not	Dedicated preconstruction team evaluates site, zoning, structural, and budget feasibility before design begins

Single point of accountability	Builder only — design and permits are your problem	You manage the architect-builder relationship	One team owns design, permitting, and construction
Bay Area zoning and permitting	General knowledge	Architect may know; builder may not	Deep experience navigating Palo Alto, Los Altos, Atherton, Menlo Park, and Cupertino permitting

SECTION 4: AWARD BANNER & PROOF BLOCK

(Dev Note: Insert the visual "Where Vision Meets Detail / Award-Winning Excellence" image block here, spanning the width of the container, immediately followed by the text below).

H2: What Sets Ritz Builders Apart

H3: Architect-Led Thinking From Day One

Ritz Builders is not a general contractor that subcontracts design. The firm's leadership team includes architects and construction professionals who collaborate from the first site visit. Design intent stays aligned with build reality because the people designing the home are the same team building it. This eliminates the translation errors, value-engineering surprises, and communication breakdowns that plague the traditional architect-then-builder model.

H3: Feasibility-First Planning

Before Ritz Builders commits to a design direction, the preconstruction team evaluates your site conditions, local zoning restrictions, structural requirements, and realistic construction costs. This feasibility-first approach catches budget conflicts and regulatory obstacles weeks before they would otherwise surface — saving clients from expensive mid-project redesigns that are common in Bay Area luxury construction.

H3: Single-Team Accountability

On a Ritz Builders project, one team owns every phase: feasibility, design, engineering coordination, permitting, material procurement, and construction. There are no handoffs between disconnected firms. When a design decision affects the construction schedule or

budget, the same team resolves it in real time rather than sending change orders back and forth.

H3: Real-Time Cost Transparency

Every design decision at Ritz Builders is paired with current material pricing and subcontractor market data. Clients see the cost implications of their choices as those choices are being made, not after a design is finalized and sent out for competitive bidding. This discipline prevents the sticker shock that derails many luxury custom home projects in the Bay Area.

H3: Deep Bay Area Regulatory Expertise

Building a custom home in Palo Alto requires a different permitting strategy than building in Atherton or Cupertino. Ritz Builders has navigated the specific planning departments, design review boards, and zoning requirements across Silicon Valley's most regulated residential markets. This local expertise directly affects project timelines and approval outcomes.

SECTION 5: SERVICE TABLE

H2: Match Your Situation to the Right Service Path

Not sure where you fit? Use this table to identify the Ritz Builders service that matches your current starting point.

(Dev Note: Ensure horizontal scrolling on mobile).

Your Situation	Best Ritz Service Path	What Ritz Helps With First	Typical Investment	Next Step
Have completed architectural plans	Build from Plans	Constructability review, budget alignment, architect coordination	\$2M–\$10M+	[Request a Plan Review] (<i>Link to /services/architect-provided-plans</i>)

Own a vacant lot	Build on Your Lot	Site evaluation, zoning feasibility, architect selection	\$2.5M–\$10M +	[Schedule a Lot Consultation] (Link to /services/build-on-your-lot)
Need one team for design and build	Design-Build	Concept discovery, integrated design, real-time cost estimating	\$2M–\$10M+	[Start a Design-Build Consultation] (Link to /services/design-build)
Want to tear down and build new	Teardown and Rebuild	Structure assessment, demolition permitting, replacement design	\$2.5M–\$10M +	[Discuss Teardown Options] (Link to /services/teardown-rebuild)
Want a complete whole-home remodel	Whole-Home Remodel	Space planning, structural assessment, scope and budget coordination	\$1M–\$5M+	[Schedule a Remodel Consultation] (Link to /services/whole-home-remodel)
Need to add space or expand	Major Additions	Space feasibility, structural analysis, design integration, zoning review	\$700K–\$3M+	[Discuss Your Expansion] (Link to /services/major-home-additions-expansions)

SECTION 6: PORTFOLIO CAROUSEL

(Dev Note: KEEP OUR CURRENT PORTFOLIO SEGMENT. Leave the "Proven Results Across the Bay Area" project slider exactly as it currently functions, positioned right here).

SECTION 7: FAQ ACCORDION

H2: Frequently Asked Questions About Building With Ritz Builders

- **Q: What types of projects does Ritz Builders specialize in?**
A: Ritz Builders specializes in large-scale luxury residential projects across Silicon Valley: ground-up custom homes, teardown-rebuilds, whole-home remodels, and major additions or expansions. The firm focuses exclusively on high-consideration projects typically starting at \$1.5M in construction investment. Ritz does not take on small single-room renovations or cosmetic updates.
- **Q: How much does it cost to build a custom home in the Bay Area?**
A: Custom home construction costs in the Bay Area typically range from \$500 to \$1,000+ per square foot, depending on site complexity, architectural design, finish levels, and local permitting requirements. For a Ritz Builders project, total construction investments generally start at \$2M and can exceed \$10M for estate-scale homes. The preconstruction team provides a realistic cost framework during the feasibility phase, before design commitments are made.
- **Q: What is the difference between design-build and traditional construction?**
A: In traditional construction, a homeowner hires an architect to design the home and then separately hires a general contractor to build it. This creates gaps in cost awareness, scheduling, and design-to-build translation. In a design-build model like Ritz Builders uses, one team manages both architectural design and construction — keeping budget, design intent, and build methodology aligned from the start.
- **Q: I already have an architect. Will Ritz Builders work with them?**
A: Yes. While Ritz Builders offers full in-house design-build services, the firm frequently collaborates with independent architects. In these cases, Ritz provides a detailed constructability review of the existing plans, aligns the design to a transparent construction budget, and coordinates with the architect throughout the build.
- **Q: How long does a luxury custom home take to build in the Bay Area?**
A: A typical ground-up custom home in Silicon Valley takes 16 to 30 months from preconstruction through final handoff, depending on project scale, site conditions, and local permitting timelines. Some Peninsula cities, particularly those with design review boards, add 3 to 6 months to the entitlement process.
- **Q: Where does Ritz Builders build?**
A: Ritz Builders serves homeowners across Silicon Valley and the San Francisco Peninsula. The firm's primary service areas include Palo Alto, Los Altos, Menlo Park, Atherton, Cupertino, Saratoga, Los Altos Hills, Los Gatos, Sunnyvale, Mountain View, Milpitas, and surrounding communities. Ritz is headquartered in Cupertino, California.
- **Q: How does Ritz Builder's handle difficult lots: hillsides, narrow sites, or steep terrain?**
A: Bay Area hillside construction requires specialized feasibility analysis, advanced structural engineering, and a detailed understanding of local grading and geotechnical requirements. Ritz Builders evaluates challenging site conditions during the preconstruction phase, before design decisions are locked in.

- **Q: Should I remodel my existing home or tear it down and rebuild?**
A: This depends on three factors: the structural condition of the existing home, your long-term goals for the property, and the relative cost of renovation vs. new construction. In many Bay Area neighborhoods, teardown-rebuild delivers better long-term value when the existing structure requires more than 60–70% reconstruction. The Ritz Builders preconstruction team can assess your home and advise on the most strategic path.
- **Q: Do I need an architect before contacting Ritz Builders?**
A: No. Ritz Builders offers a complete design-build service that includes architectural design, so you do not need to arrive with plans in hand. However, if you already have an architect or completed plans, Ritz will work with them. The consultation process begins with understanding your project goals, not requiring finished drawings.
- **Q: What should I look for when choosing a custom home builder in the Bay Area?**
A: Look for a builder with direct experience in your specific city's permitting and zoning environment, a structured preconstruction and feasibility process, transparent cost practices, and a portfolio of completed projects at the scale and quality level you expect. Ask whether the firm provides architectural design leadership or simply executes plans, and whether budget alignment happens during design or only after bidding.
